

What is new in farm to school?

Who is the special guest in your student's classroom that you hear them talk about? The special guest is an AmeriCorps Farm to School Specialist!

The AmeriCorps Farm to School Specialist who works with HSSD School Nutrition paired up with kindergarten through fifth-grade teachers. The specialist will teach farm to school-related lesson topics to the students in addition to the teachers' curriculum. The topics they will teach are MyPlate/Food groups, Where Food Comes From, Diversity in Food and Nutrition, Building Healthy Habits, and Exposure to a Variety of Foods. These lessons will give the students a different perspective and understanding of the curriculum they learn.
